

Inclusive Growth for Clackmannanshire

List of Data

The list of data was assembled using:

1. The Economic Case,
2. A suggested list of data provided by colleagues in Scottish Government (which was updated),
3. Data gathered during the production of the Clackmannanshire Local Outcomes Improvement Plan
4. Supplementary relevant data gathered for the purposes of this exercise.

The Data was organised in sections under the headings of the 5 Scottish Government inclusive growth themes of:

- Economic Performance
- Labour Market Access
- Fair Work
- People
- Place

When reading the data it should be noted that light red shading indicates performance below Scottish average, light green shading indicates performance above Scottish average and no shading indicates performance equal to the Scottish average. This does not however give any indication to the degree of differential to the Scottish average.

Economic Performance

Indicator	Clacks	Stirling	Scotland
Business start-up rate 2015 (per 10,000 resident adults)	39	52	49
